Phase I: Phase I Programming is a 30-day primary residential treatment. This is where primary issues are identified. Clients will work on gaining awareness of how chemical use has caused them major life problems and impacted their families. Treatment is individualized and based on a Dialectic Behavior Therapy modality.

Phase II: Phase II is an extended care residential program 30-60 days in length designed for the client who has recently completed a primary (Phase I) treatment program and needs longer term addressing identified issues in a detailed and extensive approach. Parenting issues, as they pertain to a recovery life skill, will be a focus with mothers with children.

Phase III: Phase III is a Halfway House program for specific clients. It is 60 days in length. Please call for availability and admission criteria.

Addiction is as destructive to families as it is for the individual. When treated as a family disease, individual outcomes shift toward positive results. In response, Wellcome Manor has developed a program that specifically addresses this matter. The entire family can be invested in the process of change. Family programming coupled with individualized treatment specifically structured for women can be the foundation for rebuilding a healthy family relationship be it with parents, spouses, siblings, significant others or children.

Also, Wellcome Manor is one of very few residential treatment centers in Minnesota to allow both primary and extended care treatment participation by a woman with her children present.

Wellcome Manor is located in Garden City, MN approximately 10 miles south of Mankato, MN. Nestled in the bend of the Watonwan River, Wellcome Manor provides a quiet and comfortable setting for families to recover.

For Questions Call: (507) 546-3295

“The mission of Wellcome Manor Family Services is to empower women who are chemically dependent to achieve freedom from addiction while rebuilding their family relationships.”
